SUSTAINABLE CONSTRUCTION IN AFRICA

Date: 22-26 Nov 2025

Location: DAR ES SALAAM

Sustainable Construction in Africa (SCA)

is a continental conference series bringing together experts from academia, industry, and policy to shape Africa's sustainable built environment.

After the success of **SCA 2025** in Nairobi, the next edition, **SCA 2027** is coming to **Dar es Salaam, Tanzania**.

Join us as we explore sustainable materials, scalable structural solutions, and policy pathways for resilient urban development across African cities.

We welcome architects, engineers, government ministries, developers, and investors to engage in keynotes, panel discussions, workshops, and exhibitions dedicated to advancing sustainable construction.
